Warranty

All table and seating products manufactured by Versteel, are guaranteed by a Lifetime Warranty against defects in materials and workmanship from the date of purchase.

Electrical items manufactured by Versteel are guaranteed against defect for a period of five (5) years from date of purchase.

Electrical items not manufactured by Versteel are covered by the manufacturers under their specified warranty.

Consumables such as gas cylinders, casters and glides are covered for a period of one (1) year. Versteel will not cover labor costs associated with replacing the casters or glides.

Wood veneer is warranted for a period of ten (10) years. Natural variations in grain, color or texture of wood should not be construed as defects under this warranty.

Versteel will replace or repair (at our discretion) without cost to our customers any item manufactured by Versteel found to be defective as a result of defective material or workmanship. We will not, however, repair any item which is not properly installed, abused or subject to any use other than that which was originally intended. The warranty does not cover normal wear and tear of the product, which is expected over the course of ownership. Any repairs by the customer must receive specific written authorization from Versteel before being executed on location to receive proper reimbursement for associated costs. In no event shall liability under this warranty exceed the original purchase price.

Warranty on plastic laminates and upholstery is not covered by Versteel but is covered by laminate and textile manufacturers under their specified warranty only. All foams, fabrics and vinyls are prone to stretch and loosen over time through normal use. This natural effect, called puddling, is covered for a period of one (1) year from the date of purchase.

There are no other warranties expressed or implied.

Care of Wood Chair Parts

Clean all surfaces frequently with water-dampened soft cloth, moving the cloth with the grain direction. Quickly buff dry. Immediately remove any liquids that come in contact with wood surfaces using a blotting action to absorb liquid. Lift objects to move them. Never pull them across the finished surface.

Avoid exposing furniture to extreme heat and cold or to wide humidity variances. Avoid exposing furniture to strong sunlight. Do not use soaps, commercial cleaners or harsh solvents (nail polish remover, acetates, etc.) as they will cause finish deterioration.

Care of Laminate Surfaces and PVC Edges

Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface, moving with the pattern and follow with a clean, dry soft cloth.

Care of Powder Coat and Nickel Frames

Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface and follow with a clean, dry cloth to buff dry.

Care of Chrome Frames

Clean with a wet cloth or window cleaner. For scuff marks or heavy soiling, a non-abrasive automotive chrome polish can be applied as directed.

Maintenance of Mechanical Parts

Clean any lint or debris from the moving parts of the mechanisms. Do not apply lubricant. Mechanisms have been designed and tested to not require lubrication under normal conditions.

Care of Upholstery Surfaces

For Versteel standard fabrics and vinyls, consult the back of the appropriate swatch card for cleaning codes and any specific instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specific instructions pertaining to your particular fabric.

Care of Poly Parts

Clean with a mild soap solution and rinse with clean water. Avoid exposure to harsh or acidic solvents (nail polish remover, orange cleaner, bleach, etc.) as it will cause finish deterioration.

Manufacturer certifies that products meet or exceed applicable ANSI/BIFMA standards and testing.

Quick Ship Program

Standard Versteel Upholstery

Standard Versteel Upholstery offers a range of materials, from fabrics in a variety of colors and textures to vinyls for soil resistance. Please refer to Versteel's fabric cards or the "Materials and Finishes" section of our web site for reference information. versteel.com

Grade-In Upholstery

Versteel has coordinated with upholstery manufacturers to simplify your order process. Many of the manufacturers' offerings have been pre-approved for application on Versteel Seating.

Contact Versteel Customer Service with your selected fabric choice to be graded in. They will supply you with the appropriate grade-in designator. On your purchase order, complete the information with the pattern name, color description and grade-in designator, and Versteel will take it from there.

Customer's Own Material

Customer's Own Materials (COM's) are not an issue on Versteel Seating. Many COM's are pre-approved for application on Versteel Seating. Call Versteel Customer Service with your COM selection to determine if it has been pre-approved. If your selection has not been pre-approved, reference the "Receiving COM Approval" section below.

Receiving COM Approval

Not all materials are suitable for upholstery on all chairs. A 12" x 12" memo sample must be supplied for approval before a COM material is accepted for an order. If the material is directional in pattern or weave, the pattern repeat (in inches) in both directions or the weave direction must be supplied.

Excess COM

Versteel will not store excess COM for more than 30 days after the order has been completed. If excess material is to be returned after order completion, send the request to Versteel Customer Service prior to acknowledge ship date. It is the customer's responsibility to arrange for the return of the material "freight collect."

COM Requiring Application Test

If an application test is required for your selected COM, send test sample material along with the following:

- 1- Name and return address
- 2- Chair model selected
- 3- Sketch showing special requirements for the positioning of the material's pattern on the chair seat and chair back, if special considerations are required.

NOTE ALL UPHOLSTERIES ARE CUT UP THE ROLL TO MAXIMIZE YIELD AND WEAR PERFORMANCE

Ship COM to: **Versteel**
2332 Cathy Lane
Jasper, IN 47546

COM must be shipped to the factory with transportation costs "prepaid." If material is considered defective or unusable, it will be returned "transportation collect."

For standard lead time orders, tag fabric with purchase order number and identify with project number if possible.

Application of Directional Fabrics

Due to the upholstering process, some fabrics not considered directional by the supplier may be considered directional by Versteel.

All COM's are cut "up the roll" unless otherwise directed by the customer. (see illustration below)

EXAMPLE PATTERN CUT "UP THE ROLL"

If special cutting or upholstery application is required, you must indicate requirement at time of order entry.

Decorative Patterns

Yardage requirements are greatly affected by the size of the repeat and the print or pattern of the material. Versteel cuts all seating patterns with aesthetic concerns in mind for high quality and consistency. Refer to the COM listing for the yardage required for pattern repeat on page 12.

The illustration below shows the proper placement of six seat panels on a piece of patterned fabric.

Please note the shaded portion of the fabric is unusable. It is not always appropriate to place a seat pattern at the edge of the fabric.

California Technical Bulletin 133 (CAL 133)**Companion**

Versteel Companion seating is available with a CAL 133 option. CAL 133 compliance is achieved by using approved fabrics and a protective barrier between the fabric and the foam.

Indicate "CAL 133 Option" on your purchase order when required. Add \$73.00 list per seat, \$73.00 list per back and \$37.00 list per pair of armcaps.

SIMON

SIMON seating upholstered with CF Stinson New Hempstead is available with a CAL 133 option.

Indicate "CAL 133 Option" on your purchase order when required. No additional charges apply.

Other Versteel Seating

Contact Versteel Customer Service for other seating CAL 133 requirements.

Compliance

Compliance has been established through third-party testing of the products. All chairs that meet CAL 133 standards will have a label attached to the underside of the seat. To maintain compliance, the label must not be removed from the product.

Versteel Seating COM Standard Yardage Requirements

COM yardage requirements are calculated for chairs and stools based on a material width of 54" and a repeat of 2" or less. For material less than 54" wide, contact Versteel for yardage requirements. Use the chart below as a guide to calculate your COM yardage. For quantities greater than 200 chairs or stools, contact Versteel Customer Service for calculation of COM yardage by chair model.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Immix Bench System

Combine curves and straight sections to create shapes and unlimited spans of seating and tables. A variety of seat and back widths can be mingled with tops of various shapes, materials and edges.

When planning a space with Immix, keep the same considerations in mind as you would when specifying product for any other space. How will the space be used? Do you need power and data? Will the product need to be moved or reconfigured in the future? Are there special user needs to be considered? Think about these and any other issues you may encounter when you plan your space.

If you are creating a configuration for a waiting room or lobby, feel secure that the Immix benches you choose have been designed and engineered for longevity with enduring finishes and high density foam.

If you have particular needs that have not been addressed in this price list, please call Versteel Customer Service for answers and recommendations.

Standard vs. À la Carte

Reconfigure A Standard Model

A standard configuration listed in this price list may have all the elements you desire, just not in the desired order. No problems. Simply call Versteel Customer Service and a representative will happily assist you with your order.

① IM2066 11 FC (standard model)

② IM2066 11 FC SST (reconfigured from standard model)

1. A standard Immix unit as found in this price list, with 20" upholstered seats and a 22" table in the middle. It has the elements you want, but not in the right order.

2. All the same elements but with the table positioned on the right, where you want it. Simply add SST at the end of your model number to indicate a seat-seat-table configuration. Contact customer service if you have any questions.

Mirror A Standard Model

In this price list you will find many standard models, but not every configuration. All of the models listed can be mirrored to fit your needs with no additional charge. To specify a mirrored model just add the letter M to the standard model number when you order. Should you have any questions or concerns call Versteel Customer Service.

① IM2055 D05 (standard model)

② IM2055 D05 M (mirrored model)

1. A standard Immix unit as found in this price list, with a 31" upholstered seat on the left and a 20" upholstered seat on the right. It has the elements you want, but you would like them flopped.

2. The mirror image of the standard model reverses the order and puts the seats where you want them. All that is required when specifying is to add M to the standard model number to achieve this configuration.

Arm to Armless & Armless to Arm

You may want to create a configuration where you will place a top between a seat with arms and a seat without arms on the same frame. Or even connect benches with arms to benches that are armless. In these cases it is possible to use standard tops, but Versteel has also designed tops just for this scenario. By using these tops, which have been specially sized, spacing will remain even throughout the configuration. Please indicate on your order or quote if the arm to armless top is desired.

Arm to armless configuration with standard 19" top. Notice the uneven spacing.

Arm to armless configuration with special 21" top. The spacing is now consistent.

Back to Back Installations

When you are creating a space using Immix benches, don't forget that the benches with backs have a slightly deeper footprint. If you plan to place benches with backs in a 'back-to-back' configuration, use the dimensions provided here to insure you will have plenty of space for installation.

Be sure to review the Space Planning section in the Tables Price List for additional general guidelines to consider when designing a space.

Always refer to local codes for restrictions and requirements.

Power, Data and Wire Management

It may be desirable to provide power and data access to your Immix configuration depending on the end use application. If so, then plan for your power and data as you would any other specification, keeping in mind where the power will come from as well as the load that will be placed on the circuit.

Review the Power & Data Planning section that is found in the Versteel Power & Data Price List for more information. If there is any risk that the circuits may not be able to carry the load, contact a qualified electrician. Also, always consult any local codes or restrictions concerning power.

Use the drawings provided on the next page to determine the location(s) you want to place power and data or grommets in your configuration.

Power & Data

When sequencing electrical units, Henri Now must be used.

Henri units are not available on 8", 10" or 11" tops.

Immix tables and benches with tops can be individually powered with Henris or sequenced using Henri Nows. Use Henri and Henri Now to conveniently power laptops and other portable electronic devices. When power and data are not required, the units will conveniently store under the table leaving the top unobstructed for usage and cleaning.

Wire Management

Use grommets to route cords for lamps and other devices through a table top to an outlet.

Locations For Henris and Grommets

Rectangular Frames

Henris, Henri Nows and grommets must be located between the cross rails on Immix frames. There are five locations for the rectangular frame that can be combined and cross-referenced for more than one application. The logic for the positioning is that as the frame grows in length, from left to right, the position moves along with it. A 22" frame has one position (Location 1) as there is only one space between cross rails. A 44" frame has 3 positions (Locations 1, 2 & 3) as there are three spaces between cross rails. The drawings at right illustrate the positions for rectangular frames and how to indicate where you would like Henris, Henri Nows or grommets.

Arc Frames & Corner Connectors

There are four locations for the arc frame positions and one for corner connectors. The drawings below illustrate the positions for Henris, Henri Nows and grommets.

Large Configurations

Larger spaces may require a larger configuration, and these may be intimidating. If you are concerned that the curves and angles you are specifying may not be the correct ones, call Versteel Customer Service for input and advice.

Versteel will also help you configure your Immix bench system if needed. Simply call Versteel Customer Service and provide the dimensions of your space and the type of configuration that you desire. Like any other space planning, it is helpful to know where power and data sources are, as well as windows, doors, any other obstructions and proposed traffic patterns.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Warranty

All table and seating products manufactured by Versteel, are guaranteed by a Lifetime Warranty against defects in materials and workmanship from the date of purchase.

Electrical items manufactured by Versteel are guaranteed against defect for a period of five (5) years from date of purchase.

Electrical items not manufactured by Versteel are covered by the manufacturers under their specified warranty.

Consumables such as gas cylinders, casters and glides are covered for a period of one (1) year. Versteel will not cover labor costs associated with replacing the casters or glides.

Wood veneer is warranted for a period of ten (10) years. Natural variations in grain, color or texture of wood should not be construed as defects under this warranty.

Versteel will replace or repair (at our discretion) without cost to our customers any item manufactured by Versteel found to be defective as a result of defective material or workmanship. We will not, however, repair any item which is not properly installed, abused or subject to any use other than that which was originally intended. The warranty does not cover normal wear and tear of the product, which is expected over the course of ownership. Any repairs by the customer must receive specific written authorization from Versteel before being executed on location to receive proper reimbursement for associated costs. In no event shall liability under this warranty exceed the original purchase price.

Warranty on plastic laminates and upholstery is not covered by Versteel but is covered by laminate and textile manufacturers under their specified warranty only. All foams, fabrics and vinyls are prone to stretch and loosen over time through normal use. This natural effect, called puddling, is covered for a period of one (1) year from the date of purchase.

There are no other warranties expressed or implied.

Care of Upholstery Surfaces

For Versteel standard fabrics and vinyls, consult the back of the appropriate swatch card for cleaning codes and any specific instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specific instructions pertaining to your particular fabric.

Care of Powder Coat and Polished Aluminum Surfaces

Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface and follow with a clean, dry cloth to buff dry.

Care of Laminate Surfaces and PVC Edges

Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface, moving with the pattern and follow with a clean, dry soft cloth. When a wood edge exists, follow instructions found under "Care of Wood Edges and Veneer Surfaces" for edge.

Care of Wood Edges and Veneer Surfaces

Clean all surfaces frequently with water-dampened soft cloth, moving the cloth with the grain direction. Quickly buff dry. Immediately remove any liquids that come in contact with wood surfaces using a blotting action to absorb liquid. Lift objects to move them. Never pull them across the finished surface.

For an additional safeguard, use a protective surface pad. Doing so could ensure a lasting finish by protecting your furniture from possible damage caused by pens and sharp objects.

Avoid exposing furniture to extreme heat and cold or to wide humidity variances. Avoid exposing furniture to strong sunlight. Do not use soaps, commercial cleaners or harsh solvents (nail polish remover, acetates, etc.) as they will cause finish deterioration. If using a protective glass top, place spacer pads under the glass top to allow the wood to breathe.

Care of Corian® Surfaces

Clean regularly with a cloth or sponge wrung out in warm soapy water. You can also use ammonia-based cleaners or commercial cleaners recommended for use on Corian® surfaces. Wipe up any water spills immediately so as not to leave a film that makes the finish look blotchy.

Configure

Utilizing basic components (a single leg, seat, back, and connector) of polished, cast aluminum, OH! is simplistic in its approach to modularity. Legs are positioned for strength and stability while connectors are used to organize the seats into configurations. By using the connector, a set distance is established between individual seats to create personal space. Plush seats, along with a curved ergonomic back option, allow users to position their bodies without interfering with their neighbors. This ensures that everyone can find their own comfort solution. Seats are also generously sized and proportioned.

Because the circle is the basis for the seating series it is possible to create an infinite number of configurations, as the designer is no longer bound by a corner. Typical OH! configurations include L, T, X, and Y as well as unlimited numbers of runs, arcs, and serpentine.

The use of the circle eliminates any sidedness to backless configurations. The addition of a back can be used to guide users to approach sides.

Tables

Tables can be inserted at any point of any configuration for optimum flexibility.

Upholstery

Upholstery may be specified in monochromatic (single textile choice) or contrasting applications (different textiles on different parts). No contact between upholstered surfaces makes for an easy to clean and more hygienic product.

**Power**

The Twine corded system offers mounted, and below-surface power and USB to multiple users in a range of settings. With just one infeed, this system can power up to six (6) MiniTap units.

Mini-Tap power can be added to any seat as an undermount option, or to any 24" diameter table as an integrated or undermount option.

Wires seamlessly run between seats via a concealed channel located on the underside of the connector.

Additional power and data can be added to any seat as an undermount option, or any table as an integrated or undermount option.

Grade-In Upholstery

Versteel has coordinated with upholstery manufacturers to simplify your order process. Many of the manufacturers' offerings have been pre-approved for application on Versteel Seating.

Contact Versteel Customer Service with your selected fabric choice to be graded in. They will supply you with the appropriate grade-in designator. On your purchase order, complete the information with the pattern name, color description and grade-in designator, and Versteel will take it from there.

Customer's Own Material

Customer's Own Materials (COM's) are not an issue on Versteel Seating. Many COM's are pre-approved for application on Versteel Seating. Call Versteel Customer Service with your COM selection to determine if it has been pre-approved. If your selection has not been pre-approved, reference the "Receiving COM Approval" section below.

Receiving COM Approval

Not all materials are suitable for upholstery on all chairs. A 12" x 12" memo sample must be supplied for approval before a COM material is accepted for an order. If the material is directional in pattern or weave, the pattern repeat (in inches) in both directions or the weave direction must be supplied.

Excess COM

Versteel will not store excess COM for more than 30 days after the order has been completed. If excess material is to be returned after order completion, send the request to Versteel Customer Service prior to acknowledge ship date. It is the customer's responsibility to arrange for the return of the material "freight collect."

Seat Accent Fabric

The OH! seat band may be specified in a different fabric than the rest of the unit. Specify and add \$273.00 list per unit.

Seat Accent Fabric SAF

COM Requiring Application Test

If an application test is required for your selected COM, send test sample material along with the following:

- 1- Name and return address
- 2- Chair model selected
- 3- Sketch showing special requirements for the positioning of the material's pattern on the chair seat and chair back, if special considerations are required.

NOTE ALL UPHOLSTERIES ARE CUT UP THE ROLL TO MAXIMIZE YIELD AND WEAR PERFORMANCE

**Ship COM to: Versteel
2332 Cathy Lane
Jasper, IN 47546**

COM must be shipped to the factory with transportation costs "prepaid." If material is considered defective or unusable, it will be returned "transportation collect."

For standard lead time orders, tag fabric with purchase order number and identify with project number if possible.

Application of Directional Fabrics

Due to the upholstering process, some fabrics not considered directional by the supplier may be considered directional by Versteel.

All COM's are cut "up the roll" unless otherwise directed by the customer (see illustration below).

EXAMPLE PATTERN CUT "UP THE ROLL"

If special cutting or upholstery application is required, you must indicate requirement at time of order entry.

Patterned COM Additional Yardage Guide

Use the guide below to aid in ordering the appropriate COM fabric when needing to match a pattern with a repeat. To use this guide, add the vertical and horizontal repeats together (e.g. a 5" vertical repeat plus an 11" horizontal repeat gives a 16" total). Then find the appropriate entry on the chart, and increase the yardage estimate by the percentage indicated.

For example: The yardage estimate is 8 yards of 54" wide fabric and the pattern has a repeat of 11" horizontal and 5" vertical. Add up the repeats (11" + 5" = 16") and find the appropriate entry – 15% in this example. Fifteen percent more fabric is required to match the pattern. 8 yards plus extra 15% is 9.2 yards.

Fabric Width	Plain Fabric	3" - 14" Repeat	15" - 19" Repeat	20" - 27" Repeat	28" - 36" Repeat	37" - 45" Repeat	46" - 54" Repeat
54"	0%	10%	15%	20%	25%	30%	35%
50" - 52"	10%	20%	25%	30%	35%	40%	45%

Decorative Patterns

Yardage requirements are greatly affected by the size of the repeat and the print or pattern of the material. Versteel cuts all seating patterns with aesthetic concerns in mind for high quality and consistency. Refer to the COM listing for the yardage required for pattern repeat.

Repeats and Striped Fabrics

The geometry of curved products prevents repeats and stripes from matching at the seams.

California Technical Bulletin 133 (CAL 133)

Contact Versteel Customer Service for CAL 133 Requirements.

Compliance

Compliance has been established through third-party testing of the products. All chairs that meet CAL 133 standards will have a label attached to the underside of the seat. To maintain compliance, the label must not be removed from the product.

OH! COM Yardage Requirements

COM yardage requirements are calculated based on a material width of 54" and a repeat of 2" or less. For material less than 54" wide, contact Versteel for yardage requirements. Use the chart below as a guide to calculate your COM yardage. For quantities greater than 10, contact Versteel Customer Service for calculation of COM yardage by chair model.

NOTE THIS CHART IS NOT APPLICABLE FOR MULTIPLE FABRICS ON ONE UNIT. CONTACT VERSTEEL CUSTOMER SERVICE FOR YARDAGE REQUIREMENTS WHEN SPECIFYING MULTIPLE FABRICS.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Studio Steel

Versteel’s “urban fabrication” process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process \$120 per chair

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.
